

# Military Fabric Frame Structures

**AMS**

Advanced Management Services, Inc.

# Reliable structures from a quality supplier

All AMS structures are manufactured to conform to a variety of military and building specifications and are available to meet permanent building codes for 40 PSF snow loads and 120 MPH winds. They are constructed of aluminum frames with flame resistant PVC-coated polyester scrim. Our top-quality fabric is mildew and bacteria resistant, treated to prevent ultraviolet degradation, is rated for 15-20 year exposure, and is available in many colors.

AMS has over 30 years of experience in supplying all branches of the United States and overseas militaries. We have a long list of references that we will provide upon request. The bottom line is that when you do business with AMS, you can be confident that we will perform up to your expectations for excellence.

In addition to our record of outstanding performance, AMS offers the following advantages and field services:

- **Large inventory for immediate shipment**
- **Erection supervisors or complete erection teams available worldwide**
- **24 hours a day standby availability**
- **Airlift or ocean delivery**

# Performance by design

**AMS provides a full line of rugged, durable, and cost-effective structures for a variety of military applications**

In the field, military personnel require equipment that is reliable and tough. AMS fabric frame structures are designed to deliver this kind of performance. All are constructed of rugged, weatherproof components that will stand up to extreme climates and weather conditions, including high wind, heavy rains, and snow.

Whatever the terrain, AMS has structures to suit a wide array of applications:

- **Aircraft hangars**
- **Maintenance buildings**
- **Ammunition bunker**
- **Emergency shelters**
- **Warehousing**
- **Housing**
- **Disaster operations**
- **Aircraft structures up to 250 ft. wide**

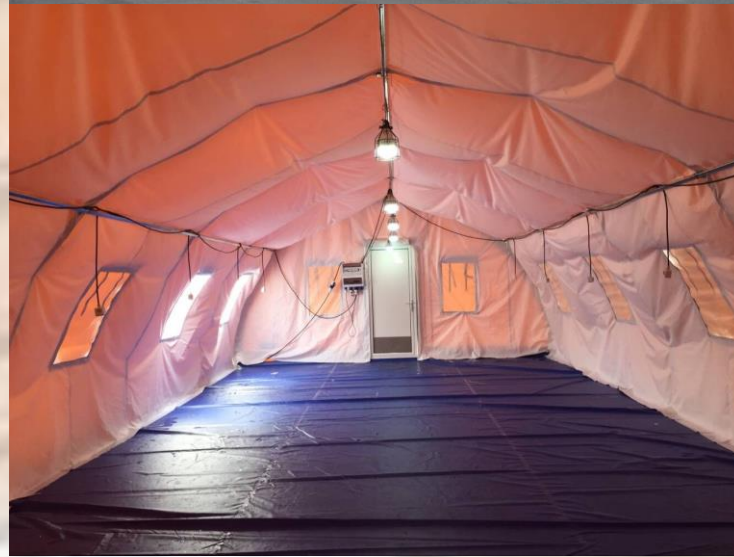

# Reliable, Customizable Structures

**AMS offers an array of options to suit any requirement**

In the field, military personnel require equipment that is reliable and tough. AMS fabric frame structures are designed to deliver this kind of performance. All are constructed of rugged, weatherproof components that will stand up to extreme climates and weather conditions, including high wind, heavy rains, and snow.
